The dissensions in the ranks of the Democracy and the Republican good chance of carrying the State

The Chicago *Herald* suggests that if Gov. Hendricks declines to run with Cleveland the Democrats can nominate Hon. John Carlisle of Kentucky, and that the people of the United States will declare for him as decidedly for President as they did against the Democratic candidate in 1880. The old man is a great, solemn farce. Hendricks is a strong candidate against whom no man can be found so far as the public record seems to be concerned. Even Benjamin Butler challenged the conviction to tell whether it meant free trade or protection. It admits that the protective policy of the Republican party has built up home industries and given to the farmer and laborer higher wages than the European and further that this system would be unable to exist if it were under the direction of the Democratic party. This is paragraph which will not do.

The Boston *Herald* says: "Charles M. Bailey is not only one of the leading business men in Maine, but he is one of the most prominent members of the Friends and a leader in the work of the Young Men's Christian Association with us. He is naturally the organizer of an enthusiastic band. Thus we believe he is a fair example of the campaign workers which the *Herald* has in Maine."

This disposes of one more campaign lie.

The effort of the Maine correspondent of the *Herald* to make it appear that there is any lack of enthusiasm among the Republicans in this state is used up by the following paragraph from the August correspondent of the New York *Tribune*

The reports of dissension in the Republican party and the so-called revolts on account of Mr. Blaine's nomination are confined to *Little's organ alone*. The party was never more united and never had a brighter outlook. With the three cents per dozen active operations to begin there is every reason to believe from the present indications that the State will be aroused from centre to circumference. At the present time the farmers who own over 8,000 have begun haying and could not, I am told, get a Democratic man to talk politics, but they know what is going on. About the middle of the month the Republican State Committee will have a meeting, and decide upon the date of beginning active operations.

New Jersey Enthusiastic

THE BLAINE AND LOGAN MEETING AT TRENTON.

[Trenton Daily State Gazette, July 7.

The Blaine and Logan ratification meeting in the Opera House last evening was a magnificent success. In numbers in enthusiasm, in the brilliant character of the speeches, it will rank as one of the most notable political demonstrations ever held in Trenton. Such a meeting, possessing the stirring words, the magnificent and striking evidence of the deep hold which James G. Blaine has upon the hearts of the people. It was the love and admiration which the people cherish for this noble statesman. The enthusiasm of the meeting did full justice to the theme which called this great assemblage together. A brilliant audience, never listened to brighter and abler speeches than those delivered by Messrs. Bourtelle and Hon. Annstable and an ominous feature of the meeting was the large number of earnest and intelligent young men present.

REMARKS OF MR. BOUTELLE.

In introducing Congressman Boutelle the first speaker of the evening, Mr. Skerm alluded to the Chicago Convention's saying its action in nominating James G. Blaine [applause] expressed the sentiment of the vast majority of the Republicans of the country. Its wisdom was confirmed at the polls in November. Mr. Boutelle received a hearty welcome. When the applause subsided he said: Although this was his first visit to the historic old town of Trenton, he was happy to say he felt like no stranger here. No man from Maine could feel thus but he felt which his people so unanimously by Maine's gallant son the Republican party's standard-bearer for President. [Applause.] This year for the first time in the history of the party the people of each entire State of the Union are united in a brighter outlook. When
